

## ***2007 Prohibited List***

### ***Summary of Major Modifications***

#### **SUBSTANCES AND METHODS PROHIBITED AT ALL TIMES (IN- AND OUT-OF-COMPETITION)**

##### S1. Anabolic Steroids

- The explanatory paragraphs 4 and 5 of this section have been reworded for clarity purposes.

##### S5. Diuretics

- For clarity purposes, the introductory sentence and first paragraph have been reworded.

##### M2. Chemical and physical manipulation

- The word "acute" has been removed from the paragraph on intravenous infusions, since the legitimate use of this method for medical purposes should be left to the judgement of the acting physician.

#### **SUBSTANCES AND METHODS PROHIBITED IN-COMPETITION**

##### S6. Stimulants

- The wording of this section is changed to more clearly define the prohibited status of stimulants. In this regard, it is stated that: *All stimulants (including both their (D- & L-) optical isomers where relevant) are prohibited, except imidazole derivatives for topical use and those stimulants included in the 2007 Monitoring Program.* This is followed by a non-limiting list of examples. The possibility that stimulants not included within the examples may in certain instances be considered a Specified Substance is contemplated by the last added paragraph in this section: *A stimulant not expressly mentioned as an example under this section should be considered as a Specified Substance only if the athlete can establish that the substance is particularly susceptible to*

*unintentional anti-doping rule violations because of its general availability in medicinal products or is less likely to be successfully abused as a doping agent.*

- Benzylpiperazine, already considered a prohibited substance, has been added as example.
- Tuaminoheptane, an alpha-agonist, used in some countries for the treatment of nasal congestion, is added as a new example of stimulant. This substance is also included in the list of Specified Substances.
- 4-Phenylpiracetam, the chemical name of carphedon, has been added for clarification purposes.
- A clarification on the permitted status of imidazole derivatives has been added.

#### S9. Glucocorticosteroids

- A series of additional examples of glucocorticosteroid routes of administration has been added to provide better guidance to TUE and ATUE applications.

### **SUBSTANCES PROHIBITED IN PARTICULAR SPORTS**

#### P1. Alcohol

- At the request of the WCBS, Billiards is removed from this section.
- It is clarified that the doping violation thresholds listed correspond to haematological values.

#### P2. Beta-Blockers

- At the request of the FIDE, Chess is removed from this section.

### **SPECIFIED SUBSTANCES**

- It is clarified that the beta-2-agonist salbutamol by inhalation is not a specified substance at urinary levels greater than 1000 ng/mL.
- The stimulant tuaminoheptane (section S6) is added to the list of Specified Substances.
- The paragraph listing the stimulants has been reworded for clarification in accordance with the wording changes made in the S6 section.
